

COMPUTATIONAL PHYSICS LAB
PHZ 4151C/5156C

Homework 9
Due Tuesday, April 14th.

(1) Read all of Chapter 11

(2) Assignments from chapter 11.6: *“Input and output streams”*

Do (1) – (11)

Locate any errors in the programs and indicate if they are compile-time, link-time or run-time errors. If the program will function properly, give its output (if the output is written to a file, specify what the contents of the file will be).

Assume **#include <iostream.h>** is entered as the first line of each program. Some programs may contain more than one error.
